Using YouTube Video in PowerPoint 2007

- Enable the Developer Tab
- Add the Shockwave Object to your PowerPoint
- Link the Shockwave Object to your YouTube video.

---

Part I. Enable the Developer Tab

1. First, enable the Developer Tab by pressing the **office jewel**.

2. Press **PowerPoint Options**.

3. Make sure the **Show Developer** check box is checked, and press **“OK”**.
Part II. Add the Shockwave Object to your PowerPoint

1. Then, click on the “Developer” tab.

2. Next, click on the “More Controls” button.

3. Scroll down to “Shockwave Flash Object”. Select it, and press “OK”.

4. Your cursor will turn into a crosshair. Draw the size that you want the YouTube video to be. You can move and resize the Shockwave object just like any other object in PowerPoint.

Part II. Link the Shockwave Object to your YouTube video

1. Go to YouTube in your internet browser, and locate the video you want to use. Copy the address of the video by highlighting the address, then pressing “Edit” and choosing “Copy”.
2. Open a text editor such as Notepad, Microsoft Word, or WordPad. Then paste the URL into the text editor by clicking “Edit” and choosing “Paste”.

3. Erase “watch?” and replace the “=” with a “/”. So the URL is changed from this:

   http://www.youtube.com/watch?v=IQ9ar3X_u1k

   To this:

   http://www.youtube.com/v/IQ9ar3X_u1k

4. This is the URL that you need to use in PowerPoint. Select the new URL, and click “Edit” and choose “Copy”.

5. Go back to your PowerPoint presentation. Right click on your Shockwave object and select “Properties”.
6. A list of properties will appear. The property we are interested in is the “Movie” property. **Right click** in the value field for the Movie property and select “**Paste**”.

![Figure showing the property field with an arrow pointing to the value field and a context menu with the Paste option highlighted.]

7. Close the Properties box and you are done.
